Reflection:
Who I am and how that will affect how I work with my Mentor

1. Do I feel comfortable asking for advice and accepting criticism? In what contexts, if any?

2. How often and under what circumstances would I like to meet my mentoring team, or to communicate with my mentors?

3. Do I want to share everything with my mentors and mentoring peers or be selective about what I discuss with those people? What kinds of things do I want to share? What kinds of things seem best not to share?

4. Am I comfortable sharing personal reflections with others, or do I prefer to maintain a purely professional relationship?
