

Long-term Goals

1. What questions do you have about what you need to do in the next 5 years as you work toward a permanent position in your field?

2. Envision your role in the workplace, in your field of interest, in a community in which you might live in 8 years.

What are your major aspirations for how you will interact with these three communities?
What adjectives or metaphors come to mind that describe your intended role in each one?

What steps will you need to take to achieve such a role?
